Work experience

Schdlr
Kaduna
Nigeria

Developer

11/2018 – present

- Developed a full-stack mobile application, "Schdlr", that allows users to share calendar. Getting offline reminders and real-time updates on events, communicate with events participants and share files. React Native was used to develop the front end. The backend, built using AWS, takes advantage of well-developed GraphQL API, Elasticsearch and OAuth2.

Andela
Lagos
Nigeria

Bootcamper

05/2017 – 05/2017

- Successfully completed a 2 weeks boot-camp and accepted into the Andela fellowship.
- Developed a full-stack application, "PostIt", following industry standard guidelines, that allows users to create groups and communicate with each other. React was used to build the frontend. The backend, built using ExpressJs, takes advantage of well-developed GraphQL API and OAuth2.
